Cybersecurity Strategy

Everyone is a member of the cybersecurity team. By investing in cybersecurity and our employees - through these five key areas - we are ensuring that the state is in a position to better protect our data and Arizona citizens.

Leverage Partnerships
Build relationships with various levels of government, education, and private sector to improve information and resource sharing and outreach.

Foster Innovation
Ability and agility to continuously improve and respond to ever evolving cyber threats.

Increase Statewide Accountability
Providing good customer service while holding our staff and vendors accountable to the citizens we protect.

Enhance Public Safety
Create stronger partnerships with law enforcement and prosecutors in order to hold criminal hackers accountable.

Improve Efficiencies
That will create a more secure, more cost effective, and more consolidation of vendors.

Leverage Partnerships
Build relationships with various levels of government, education, and private sector to improve information and resource sharing and outreach.
